

EDU

EUROPE DIVERSE AND UNITED

ERASMUS+ PROJECT

JUNE 2022 - NEWSLETTER N° 1

PROJECT NUMBER: KA220-SCH-22310CD2

The EDU project aims to develop innovative teaching materials, with three main objectives:

- facilitate the teaching of European values in schools,
- convey the importance of similarities and differences between different cultures,
- educate children to active citizenship.

These objectives will be achieved by developing the following project results:

The EDU Manual and Training Platform

The EDU European heritage – Innovative teaching materials

The EDU European facts - A European Integration Resource Tool

Our consortium consists of five project partners:

Propel Europe - Belgium

Quality Culture - Italy

Doukas School - Greece

IDEA Education Agency for Development and Innovation - Poland

AEDE - Belgium

Project logo - it's official!

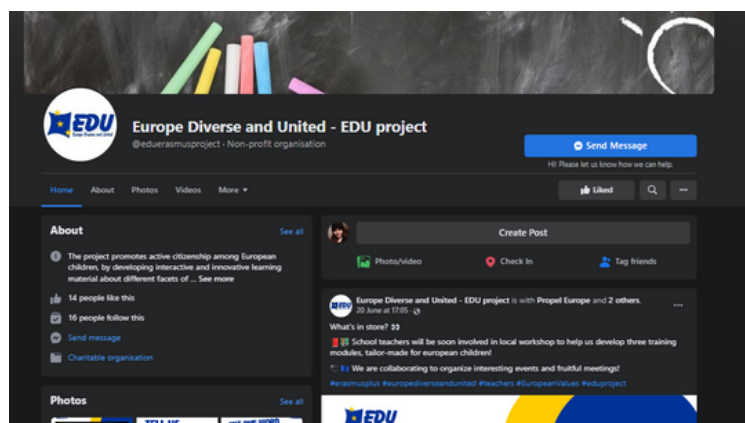

Our project logo contains the project name abbreviation and short subtitle. The blue square-like shape on the left with the golden stars refers to the European Union flag.

ALREADY LAUNCHED!

Our official facebook page has already been launched. You will find there every information about the project results and also additional related materials for further reading. So far the page contains two posts maintained in the graphic design assigned to the project - the blue and yellow which are naturally referring to the colors of the EU flag. The profile picture is our official project logo.

Go have a look!

COMING SOON...

School teachers will be soon involved in local workshop to help us develop three training modules, tailor-made for european children! We are collaborating to organize interesting events and fruitful meetings!

Our official website is under development! We've discussed the design and information that will be presented there. For sure you will find all project outputs, including educational platform, so you don't have to worry about getting lost in many different web addresses. There will be a bookmark containing all partner organisations descriptions and their members bios. The page is aiming to be a place gathering all information about the project in a coherent and transparent way with easy access an intuitive navigation.

Project consortium decided that monthly meetings will be held to track the project development and resolve any possible concerns in a timely manner. That will assure the project smooth and efficient implementation.
